Today, wide changes have occurred in life of all people. Malnutrition, unhealthy diet, stress and so on are the presentations of unhealthy life style that they are used as dominant form of lifestyle. Besides, the children are facing new challenges. For instance, emerging new technologies within IT such as the internet and virtual communication networks, lead our world to a major challenges that threatens the physical and mental health of children and adults. The challenge is the overuse and misuse of the technology.

Therefore, It's extremely important for children to continue (or to start) to lead a healthy lifestyle, including eating nutritious meals, as well as getting plenty of exercise and adequate sleep every day. These positive health habits will help children grow strong, stay healthy, and decrease the likelihood that they will become obese.
